**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5 and 7 remain rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 5 and 7 recite the limitation "separate or successive applications of formulas I and II" in 2 of claim 5. There is insufficient antecedent basis for this limitation in the claim since in a mixture active ingredients (formulas I and II) would be applied simultaneously, i.e. jointly.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 5 and 7 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for mixture comprising compound of formula I and dithianon (formula II), does not reasonably provide enablement for using formula I separately from or in succession to using formula II. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make / use the invention commensurate in scope with these claims. Data provided by applicant is to using a mixture of formula I and II not to separate

applications of formula I and formula II. See specification pages 10-12. The specification is not enabled for separate or successive applications of formulas I and II.

***Response to Applicants' Argument***

Applicant argues that Examiner appears to be narrowly construing the claimed synergistic composition and method as requiring the formulae I and II are mixed together, and applied simultaneously or in the form of a premix. Applicant points Examiner to the specification on page 4 lines 30-33 where it states "both compounds can also be applied in succession". Examiner reiterates that the specification provides synergistic results for the mixture, i.e. when the two components are combined and mixed together in the same vessel. The specification clearly supports the mixture being synergistic by the data disclosed therein. However although the Specification on page 4 lines 30-33 recites, "synergism results from the application of active components successively", there is no data provided in the specification which supports the successive application of the active ingredients. For this reason the 112 rejections on record are maintained.

Claim 10 provides for the use of a fungicide mixture, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 10 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper

definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

*Response to Applicants' amendment of claim 10*

The rejection is withdrawn. Claim 10 has been amended from being a nonstatutory "USE" claim into an independent statutory method claim.

***Allowable Subject Matter***

Claims 1-4,6,8-10 are allowable. Applicant provides synergistic data for a mixture comprising instant formulas I and II.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
